REBATE SYSTEM

The VIVENTO rebated interior door system is a timeless solution that combines traditional aesthetics with contemporary precision workmanship. It provides a stable and tight seal, guaranteeing users comfort and, in combination with a drop down seal, excellent sound insulation. The standard design of the rebated system makes installing and adapting to different frame types easy.

It typically features the 'rebate' or a stepped indentation in the door leaf that overlaps the frame after closing, rather than coming flush with it. Its distinct line adds a traditional touch to the door, blending perfectly with a variety of interior styles, classic to rustic. The rebate is also a stylish detail that boosts the visual appeal of the entire door leaf.

All our door models include rebated variants in all of our collections. They come with screw-in hinges and a mechanical key lock, turn and release lock, euro profile lock or mortise latch as standard.

DIMENSIONS

- Rebated, S2×H2 in mm: "60"=644×2030, "70"=744×2030, "80"=844×2030, "90"=944×2030
