

# NON-REBATED DOORS

## SIMPLE SYSTEM

The SIMPLE non-rebated doors from VIVENTO exemplify a minimalist and contemporary approach to interior design. With concealed hinges and a rebate-free design, they create a perfectly smooth, aesthetically pleasing flush surface with the frame when closed.

The SIMPLE System is available as all door leaf models in the BRILLIANT, ELEGANTE, PRESTIGE and BASIC Collections, as well as in the SOLID PLUS entrance door and in special purpose doors: SILENZIO HAL 32 and FIRE RATED SILENZIO HAL 32.

Our standard SIMPLE doors are fitted with mortise hinges that can be adjusted in three planes: three pieces per each model of the BRILLIANT, SOLID PLUS and SILENZIO HAL 32 and FIRE RATED SILENZIO HAL 32 Collections, and two pieces per each model of the ELEGANTE, PRESTIGE and BASIC. Chrome-plated as standard, these hinges can also be ordered in white, black or gold without a surcharge. These doors boast quiet and smooth closing thanks to the magnetic lock, available as a key lock, turn and release bathroom lock, euro profile cylinder or a mortise latch. Chrome-plated as default, this magnetic lock can be ordered in white, black or gold for a surcharge. The SOLID PLUS, SILENZIO HAL 32 and FIRE RATED SILENZIO HAL 32 ranges feature a mechanical lock.

If a turn and release magnetic lock is used, users need a 35 mm square piece for reducing the bolt diameter from 6 mm to 4 mm, which ensures correct operation of the mechanism in the lower handle escutcheon. The use of two reducing pieces is recommended to prevent them from shifting during operation. Please remember that when you change the height of the SIMPLE doors, the position of the hinges also needs altering, which is included in the system cost, while a change in the position of the lock is available for extra charge. When ordering the double door version, please specify precise dimensions of your wall opening. Bearing in mind a special design of the lock within the SIMPLE system, installing a handle with a separate keyhole cover plate is recommended.

### DIMENSIONS

- SIMPLE non-rebated system, S2×H2 in mm: "60"=618×2017, "70"=718×2017, "80"=818×2017, "90"=918×2017

## NON-REBATED DOORS

# SMART SYSTEM

The SMART System doors are new products in VIVENTO's range and an advanced interpretation of non-rebated doors as well - a solution created for those seeking minimalist elegance with a pure form. The system's characteristic rebate-free design means that when closed, the door leaf blends perfectly into the wall surface, creating a one plane with the frame. This adds a subtle but very clear and perfectly tuned-in effect to the contemporary, restrained interiors. In contrast to the classic non-rebated systems, the hinges in the SMART System are subtly visible - made of steel, slim and fitting neatly, they form an impressive aesthetic with the door frame as its integral detail.

The SMART System is available in all door leaf models from the BRILLIANT, ELEGANTE, PRESTIGE and BASIC Collections, making it an ideal choice for both unadorned spaces and more sophisticated, designer arrangements. It is a solution created to balance visual purity of form with the promise of durability and reliable everyday use.

The SMART doors are fitted with three butt-type chrome steel hinges, which ensure smooth operation and stability of the leaf. The mechanical lock used is available in as a key lock, turn and release bathroom lock, euro profile cylinder lock and a mortice latch version - all these options guarantee security and functionality. The colour of the lock matches a relevant collection range and colour group, with a choice of zinc- or nickel-plated variants. A particular attention is due to the specially designed lock keep plate, which lies almost invisible when the door is closed.

When changing the height of the SMART door, the position of the lower hinge needs altering, while the required change in position of the lock is at an extra charge.

The SMART system a marriage of elegance and technology. Its minimalist form, precision craftsmanship and balanced details make it a solution that easily fits into the contemporary language of interior design.
